Executive Summary & Key Findings

Transactional analysis of 3,900 purchases surfaces clear patterns in revenue contribution, product performance, and customer segments.

Revenue by Gender

Avg Purchase Amount

Top 5 Products (Rating)

| | |
|---------|------|
| Gloves | 3.86 |
| Sandals | 3.84 |
| Boots | 3.82 |
| Hat | 3.80 |
| Skirt | 3.78 |

Revenue by Age Group

Customer Segments

| | |
|-----------|-------|
| Loyal | 3,116 |
| Returning | 701 |
| New | 83 |

Project Overview

Project Goal

Uncover insights on spending patterns, customer segments, product preferences, and subscription behavior to guide strategic decisions.

Data Scope

Analysis based on a comprehensive dataset of 3,900 transactions across various product categories.

Key Outputs

Delivering actionable insights, an interactive Power BI dashboard, and data-driven business recommendations.

Dataset Summary

Demographics

Age, Gender, Location, Subscription Status

Purchase Details

Item Purchased, Category, Purchase Amount, Season, Size, Color

Behavior & Experience

Discount Applied, Promo Code Used, Previous Purchases, Frequency of Purchases, Review Rating, Shipping Type

DATASET SHAPE

3,900

Total Rows

18

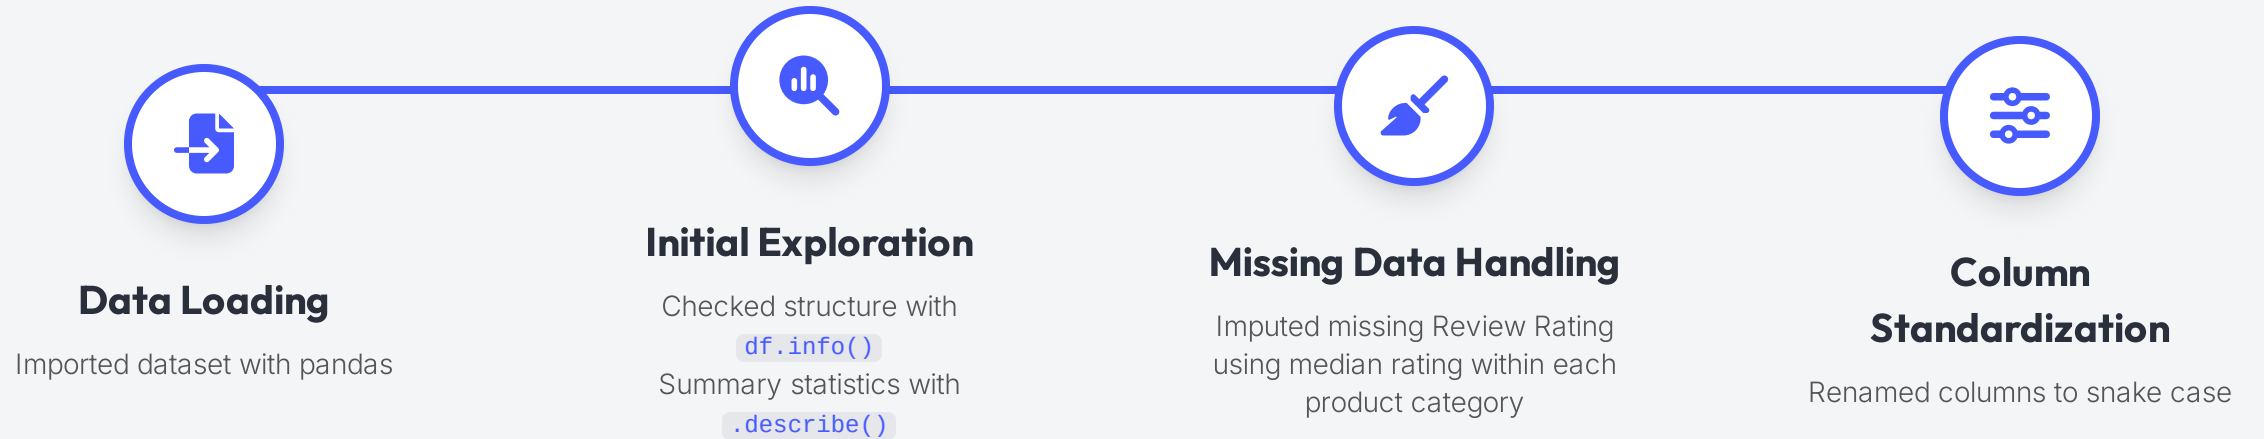

Columns

Data Quality Note

37 missing values identified in the *Review Rating* column.

Python EDA Workflow (Preparation)

Workflow Summary

The preparation phase established a clean and consistent dataset foundation. By addressing missing values strategically and standardizing formats early, we ensured reliable downstream analysis in SQL and Power BI.

- Load → Explore → Clean missing → Standardize columns

Feature Engineering & Data Integration

Feature Engineering

- Created **age_group** by binning customer ages
- Created **purchase_frequency_days** from purchase data

Consistency Check

- Verified redundancy between *discount_applied* and *promo_code_used*
- Dropped *promo_code_used*

Database Integration

- Connected Python to PostgreSQL
- Loaded cleaned DataFrame for SQL analysis

Data Pipeline Flow

SQL Findings: Gender Revenue & Discount Behavior

Revenue by Gender

Comparison of total revenue generated by male vs. female customers.

High-Spending Discount Users

839 customers

Identified customers who used discounts but still spent above the average purchase amount.

Sample Purchase Amounts (\$)

| | | | | |
|----|----|----|----|----|
| 64 | 73 | 90 | 85 | 97 |
| 68 | 72 | 81 | 90 | 62 |

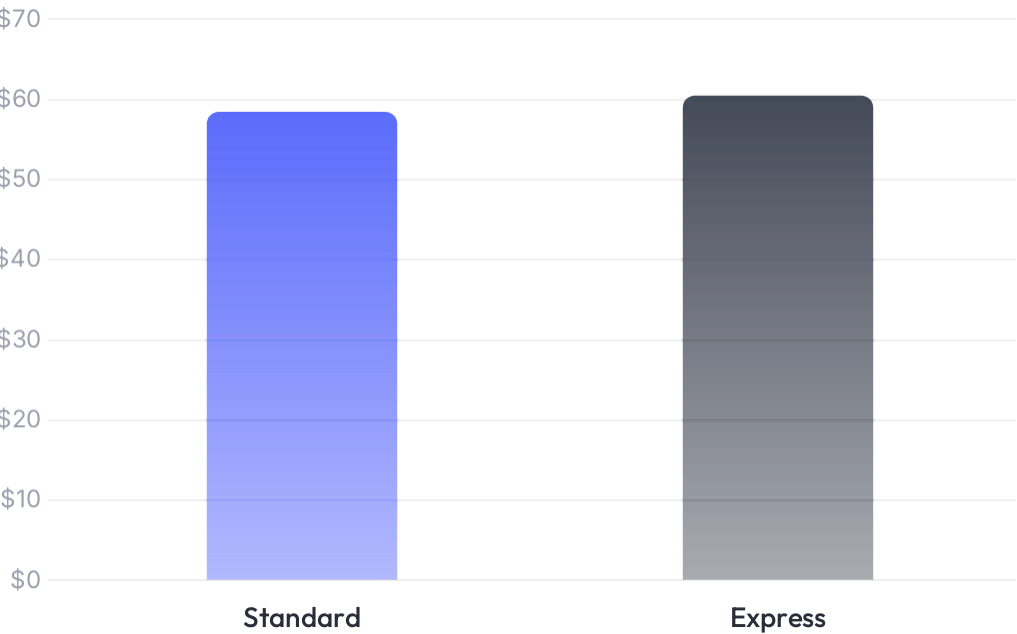

**Sample of top 10 transactions*

SQL Findings (3): Top 5 Products by Rating

SQL Findings (4–5): Shipping & Subscription

Avg Purchase Amount by Shipping Type

Subscribers vs Non-Subscribers

| Status | Customers | Avg Spend | Revenue |
|--------|-----------|-----------|-----------|
| Yes | 1,053 | \$59.49 | \$62,645 |
| No | 2,847 | \$59.87 | \$170,436 |

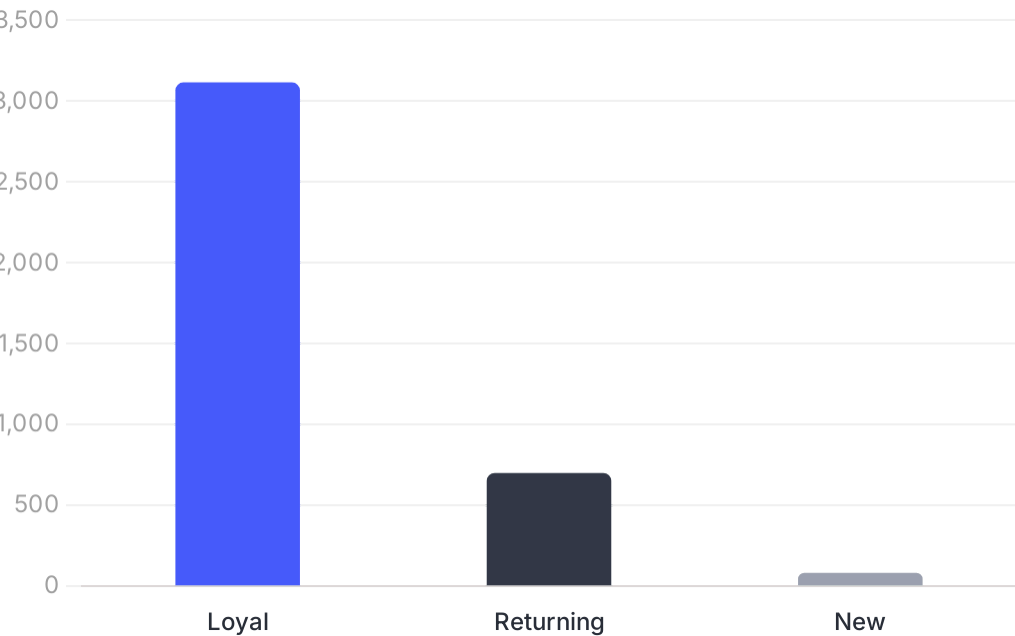

SQL Findings: Discount-Dependent Products & Segmentation

Top 5 Discount-Dependent Products

Products with highest percentage of discounted purchases.

Customer Segmentation by Count

Distribution of customers across Loyal, Returning, and New segments.

Additional SQL Insights

Top Products by Category

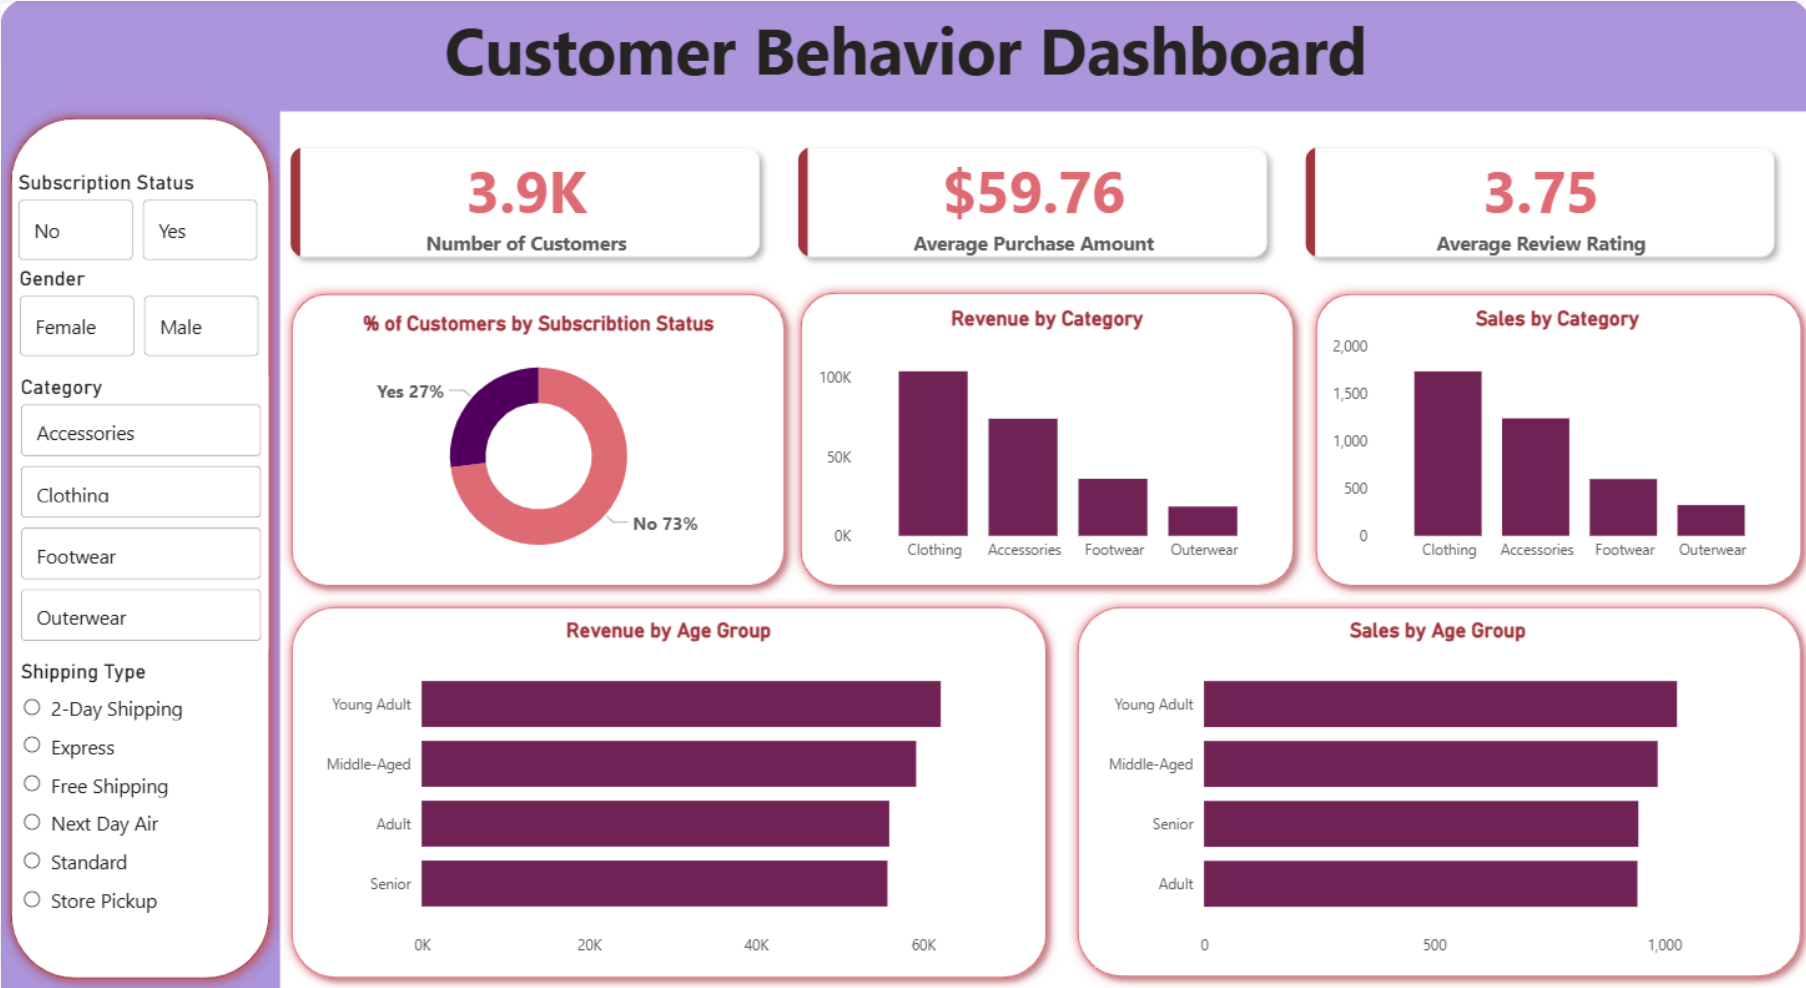

| | |
|---|---|
| <div> Accessories</div> <div><div>Jewelry171 orders</div><div>Sunglasses161 orders</div><div>Belt161 orders</div></div> | <div> Clothing</div> <div><div>Blouse171 orders</div><div>Pants171 orders</div><div>Shirt169 orders</div></div> |
| <div> Footwear</div> <div><div>Sandals160 orders</div><div>Shoes150 orders</div><div>Sneakers145 orders</div></div> | <div> Outerwear</div> <div><div>Jacket163 orders</div><div>Coat161 orders</div></div> |

Repeat Buyer Insight

Power BI Dashboard

Interactive dashboard built to present insights visually

Business Recommendations

Boost Subscriptions

Promote exclusive benefits for subscribers.

Customer Loyalty Programs

Reward repeat buyers to move them into the "Loyal" segment.

Review Discount Policy

Balance sales boosts with margin control.

Product Positioning

Highlight top-rated and best-selling products in campaigns.

Targeted Marketing

Focus efforts on high-revenue age groups and express-shipping users.

Strategic Growth Focus

Thank you

Data-driven customer insights for stakeholders
